Notes: The total capacity (including Header De-Duplication) of an IP-20C unit is double the figures in the tables below. It should be noted that there are two IP-20C models, with a different limitation of the top capacity per terminal (unit). An IP-20C model that supports 80 MHz channels will support a total capacity of 1.3 Gbps (per terminal), whereas other models support 1 Gbps.
